

ELEA INNERDUCT

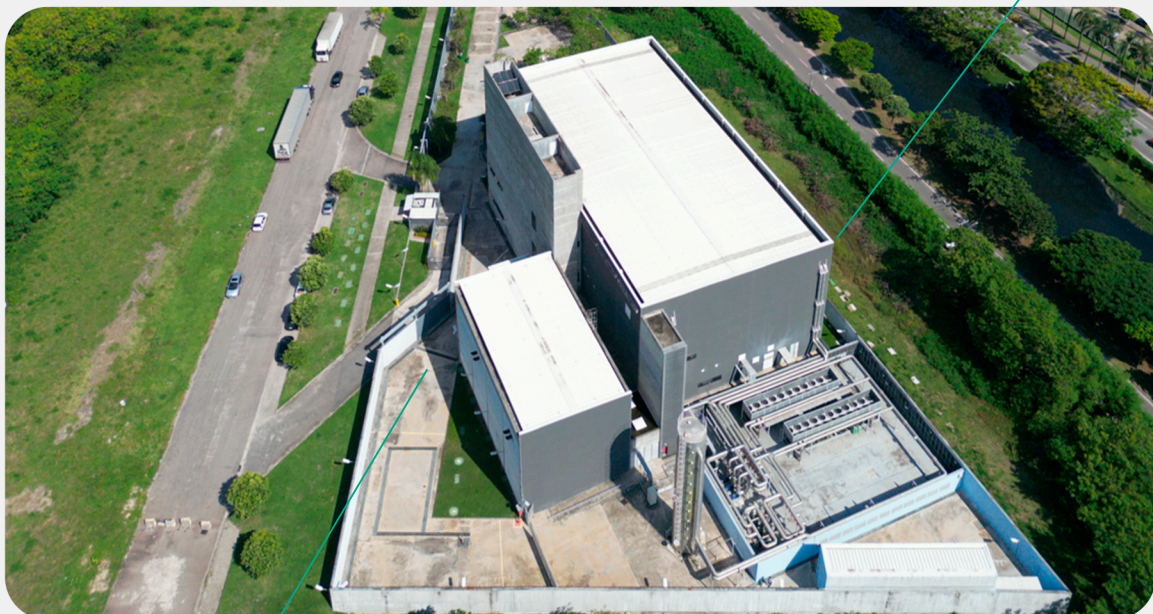

Elea

DATA CENTERS

Elea Innerduct is the solution that allows customers to utilize Elea Data Centers' sites using their own optical fiber.

Each data center has two approach points that can be utilized in projects requiring dual access.

TOPOLOGY

Approach 1

Approach 2

Note: Example topology at site RJ01.

Benefits

Enhanced
Connectivity

Flexibility
and Scalability

Seamless Collaboration with
Other Participants in the Elea
Ecosystem

About Elea Data Centers

Elea Data Centers is Brazil's most geographically distributed sustainable data center platform. We are powered by 100% renewable energy. Learn more at www.eleadatacenters.com.
