

ELEA LAST MILE CONNECT

Elea
DATA CENTERS

Elea Last Mile Connect is the dedicated solution that interconnects a customer's site to its environment within Elea Data Centers. This solution is delivered through either an L2L connection at Layer 2 or a Dark Fiber connection at Layer 1 (unlit optical fiber).

TOPOLOGY

Benefícios

Low Latency: Connect directly to the data center with Elea Last Mile Connect and experience significantly reduced network latency. Achieve faster response times for applications and services, ensuring an enhanced user experience.

Performance: Eliminate reliance on public internet and enhance the performance of critical applications such as ERP, CRM, and essential services. Gain greater operational efficiency to drive business success.

Security: Ensure a more secure communication channel with direct interconnection to the data center. Reduce exposure to cyber threats and safeguard sensitive data with Elea Last Mile Connect-tailored security for what matters most.

Scalability: Benefit from a flexible and scalable IT infrastructure designed to grow with your business. Elea Last Mile Connect enables expansion without compromising performance or security, adapting to your evolving needs.

Simplified Management: Leave carrier management to us! With Elea Last Mile Connect, we streamline processes and deliver efficiency, allowing you to focus on what's most important.

About Elea Data Centers

Elea Data Centers is Brazil's most geographically distributed sustainable data center platform. We are powered by 100% renewable energy. Learn more at www.eleadatacenters.com.
