

ELEA METRO CONNECT

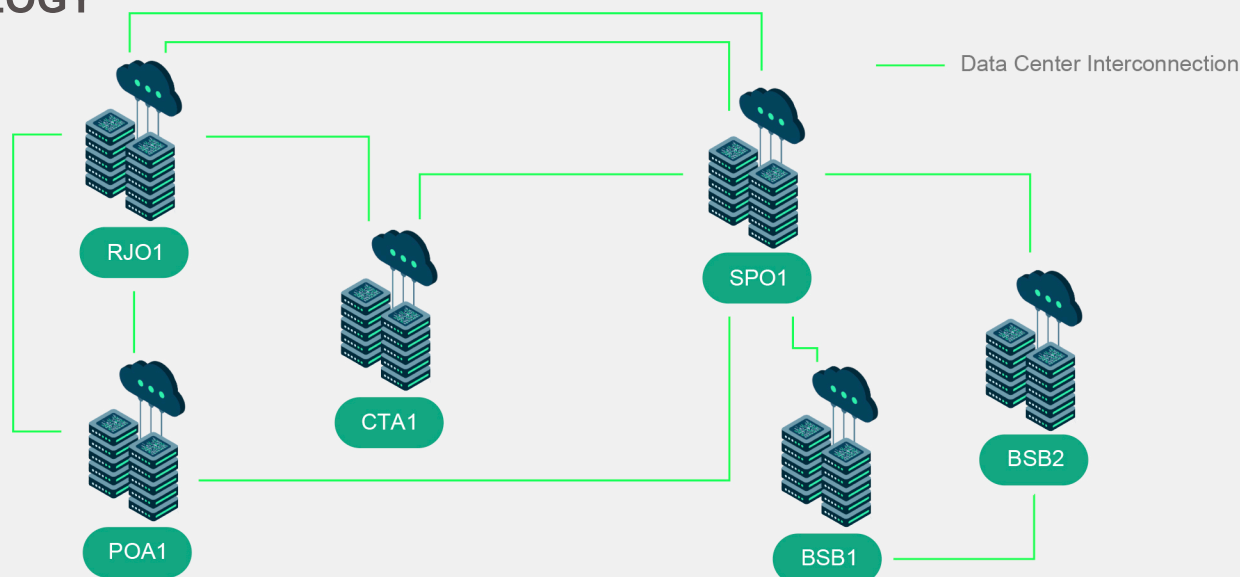

Elea
DATA CENTERS

Elea Metro Connect is the solution that interconnects Elea's data centers. It connects environments within the same customer infrastructure or between different customers.

The available speeds for this service are: 10Mbps, 20Mbps, 50Mbps, 100Mbps, 200Mbps, 500Mbps, 1Gbps, 2Gbps*, 5Gbps*, 10Gbps*

*Note: Higher speeds are available through custom projects.

TOPOLOGY

Note: Example topology involving Elea sites.

Benefits

Redundancy and Reliability

Ensures high availability and rapid recovery in case of failures, with secure data replication across multiple locations.

High Performance and Low Latency

Optimizes performance and enhances the end-user experience by processing data closer to usage points.

Security

Strengthens protection against cyber threats through distributed security measures and secure data replication.

Scalability

Simplifies infrastructure expansion to new markets or growing demand.

Geographic Distribution

Organizations operating in multiple regions can use Elea Metro Connect to efficiently distribute services and data, addressing the specific needs of each market.

About Elea Data Center

Elea Data Centers is Brazil's most geographically distributed sustainable data center platform. We are powered by 100% renewable energy. Learn more at www.eleadatacenters.com.
