

ELEA PARTNER IX

Elea Partner IX is Elea Data Centers' direct interconnection service, allowing customers to connect with the networks of leading Internet Service Providers (ISPs) and companies with Autonomous Systems (AS). This solution facilitates efficient, secure, and cost-effective data exchange and traffic flow.

With Elea Partner IX, customers gain key competitive advantages, such as:

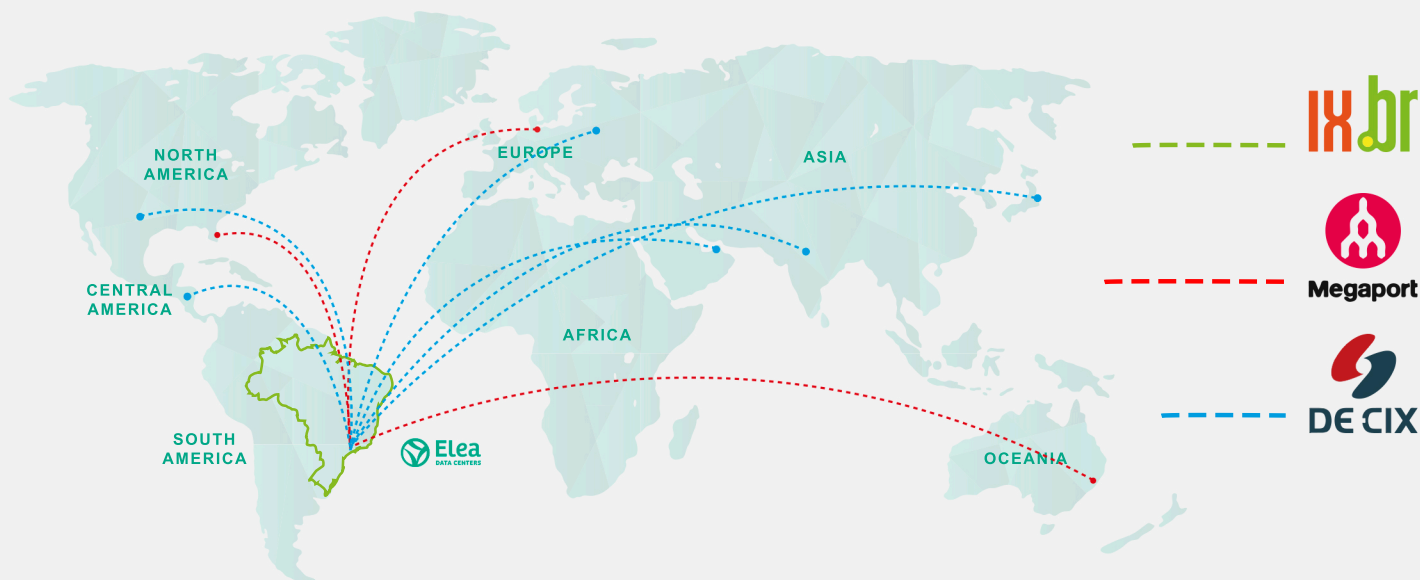

- Faster connections between providers
- Reduced internet bandwidth consumption, as traffic exchange between IX participants happens within the platform.

Additionally, the service provides access to both local and global content and services, offered by the world's leading Internet Exchange Points.

Available Speeds: 1Gbps, 10Gbps, 100Gbps, and 400Gbps*

*Subject to partner availability at each site.

Connect to the World's Leading Internet Exchange Points

*DE-CIX and Megaport IX services will be available in Q1 2025 and Q2 2025.

ACCESS TO GLOBAL SERVICES

Megaport: Over 860 PoPs and 50+ IXs worldwide.

DE-CIX: Connected to more than 3,000 ASNs.

IX.BR: The largest Internet Exchange in the world, efficiently and securely connecting Brazil to the global network.

Recommended for ISPs, content providers, and large enterprises, Elea Partner IX is the ideal solution for companies that require high-performance interconnection to optimize their operations and improve end-user experience.

About Elea Data Centers

Elea Data Centers is Brazil's most geographically distributed sustainable data center platform. We are powered by 100% renewable energy. Learn more at www.eleadatacenters.com.
